Relevant Skills	Programming Languages: Go, Python, Java and other JVM languages... Frameworks: Spring, Gin-Gonic, Django Methodologies: Agile, Scrum, TDD with various stacks Agentic Development: Codex, Cursor, cross-agent AI skill development and maintenance Tools: Git, Docker, Terraform, Splunk cloud Interests: software design, open source, algorithms, devops	
Languages	Spanish: native English, French: can conduct business German, Norwegian, Polish: beginner	
Experience	Senior Software Engineer (contractor) SNYK, REMOTE	May 2026 - present
	Develop and maintain Snyk CLI and its shared Go application framework. Delivered improvements to rate-limit handling, memory controls, CLI help, dependency security, report generation, and release monitoring. Strengthened multi-channel deployments with checksum and GPG verification. Tech: Go, TypeScript, GitHub Actions, CircleCI.	
	Senior Software Engineer SPLUNK, KRAKÓW, POLAND	July 2023 - April 2026
	Guided Experience (September 2025 – April 2026) – joined a project delivering a new data-onboarding experience for Splunk Cloud, owning scope-bounded architecture decisions and integrating AWS Bedrock via LangChain. Introduced agentic development workflows and developed reusable cross-agent AI skills.	
	Splunk Cloud Data Manager (July 2023 – August 2025) – development, code reviews and testing (unit, automated integration and manual) for features that improve integrations with cloud providers, plus 2nd-level customer support and participation in the on-call rotation. Mostly working on AWS and Splunk Cloud. Tech: Python, PyTest, AWS CloudFormation/CloudWatch/Organizations, and automated unit+integration pipelines across Splunk Cloud.	
	Principal Cloud Development Engineer PEGASYSTEMS, KRAKÓW, POLAND	September 2022 - August 2023
	Integrated in the Cloud Storage team, leading development, code reviews, and coordinated infrastructure changes across AWS and GCP using Go, Terraform, Kubernetes, and TDD practices.	
	Senior Software Engineer AKAMAI TECHNOLOGIES, KRAKÓW, POLAND	August 2020 - August 2022
	Led Developer Experience projects simplifying infrastructure provisioning. Maintained Go Akamai Terraform Provider integrations and Go, Python, and Java EdgeGrid SDKs, leading Java and Python parity. Led Akamai CLI dependency isolation and resolved long-standing GitHub issues.	
	Java Programmer APPLANDEO, KRAKÓW, POLAND	April 2019 - July 2020
	Developed retail backend services in a microservices architecture and migrated services from Java to Kotlin. Built reactive services with RxJava, RxKotlin, Spring Reactor, Vert.x, and Micronaut; used Gradle, Groovy, and Spock for builds and testing. Handled daily Kubernetes operations, followed TDD, and shared regular on-call duties while contributing to architecture and production support.	
	Java Programmer ALTEN, KRAKÓW, POLAND	August 2018 - January 2019
	Built full-stack REST features with Spark Java, mentored junior engineers, and maintained automated tests and continuous integration with Maven.	

Senior Java Programmer

2018

PROJECT PEOPLE, KRAKÓW, POLAND

Designed a new CRM core and security layer using Spring Boot 2, JWT, MySQL, and end-to-end tests while preserving legacy migration compatibility.

Software Engineer

July 2016 - April 2018

BROWN BROTHERS HARRIMAN, KRAKÓW, POLAND

Led and developed Java financial systems, including a Spring Boot/Angular/DB2 corporate-actions UI and a WebSphere tax platform; introduced upgrades, CI, and TDD.

Full Stack Python Web Developer

September 2012 - June 2016

UNI RESEARCH AS, BERGEN, NORWAY

Owned web architecture, development, and maintenance for a research institute. Consolidated departmental WordPress sites into a company-wide Django CMS and built portals for smaller research projects using reusable open-source components. Trained users across departments and supported content migration. Stack: Python, Django, PostgreSQL, Elasticsearch, Redis.

Contractor

2011 - 2012

BELGIUM

Delivered ERP and invoicing features using Python, OpenERP/Odoo, PostgreSQL, Java EE, Spring, and Hibernate.

J2EE Analyst-Programmer

Jun 2009 - May 2011

EUROPEAN COMMISSION, BELGIUM

Maintained ARES document management system and delivered reporting and data-warehouse improvements using Java, Spring, Documentum, and Oracle.

Java Programmer

2007 - 2009

MADRID, SPAIN

Built Java EE/SOA applications with Hibernate, Struts, MySQL, JSP, and JavaScript; maintained Linux development environments.

Education

Certifications: GCP Associate Cloud Engineer (2022); SCJP (2009)

Universidad Pontificia Comillas, Madrid

2003 - 2007

BS IN INFORMATION SYSTEMS AND DECISION ASPECTS
